

Occupational Health & First Aid Supplies

Health & Safety (First Aid) Regulations amended October 2013

British Standard for Workplace First Aid BS8599-1

Employers are required to conduct a risk needs assessment and choose a first aid kit that meets their needs. The British Standard BS8599-1 for Workplace First Aid offers four kit sizes, and guidelines to match the kit to the workplace.

1. Identify your risk needs:
2. Decide on the size and quantity of kits required to meet your risk needs assessment:

LOW RISK
(e.g. shops, offices, libraries etc.)

HIGH RISK
(e.g. light engineering and assembly work, food processing, warehousing, extensive work with dangerous machinery or sharp instruments, construction, chemical manufacture etc.)

SMALL KIT USAGE GUIDELINES

LOW RISK Less than 25 employees
HIGH RISK Less than 5 employees

MEDIUM KIT USAGE GUIDELINES

LOW RISK 25-100 employees
HIGH RISK 5-25 employees

LARGE KIT USAGE GUIDELINES

LOW RISK 1 Large Kit per 100 employees
HIGH RISK 1 Large Kit per 25 employees

Adopting the British Standard Kits is the best guarantee of remaining fully compliant with the law.

| BS8599-1 KIT CONTENTS | SMALL | MEDIUM | LARGE | TRAVEL |

All Blue

BS8599-1 compliant Catering Kits are designed specifically for use in busy kitchens and all catering environments. Contents are blue, making it a true blue catering kit.

It is an offence to contaminate food, the only way to save yourself from prosecution is to prove due diligence. BS8599-1 Catering Kits have been specifically designed with all blue contents, this proves that every reasonable precaution to prevent food contamination has been taken.

Q. 'Which soup contains a first aid dressing?'

A. 'Both!'

For many years it has been a legal requirement to use only Blue Detectable plasters in food preparation areas. Our kits go above and beyond this requirement by providing you for the first time with a kit where every single product, even the dressings and wipes, are all Blue. With one of our All Blue Catering Kits in your workplace, there is no better way to demonstrate to the authorities that you are taking your responsibilities seriously.

NEW
 February 2014

British Standard for Vehicle First Aid Kits
BS8599-2

Three sizes of Motorist First Aid Kits have been professionally designed to meet the needs of drivers and their passengers.

- Identify passenger numbers and vehicle type:
 - 1-3 PASSENGERS**
 (e.g. mopeds, motorcycles, motor tricycles, quadricycles etc.)
 - 1-8 PASSENGERS**
 (e.g. cars, taxis, commercial vehicles etc.)
 - 1-16 PASSENGERS**
 (e.g. minibuses, small buses etc.)
 - 17+ PASSENGERS**
 (e.g. buses, coaches etc.)
- Decide on the size and quantity of kits required to suit your vehicle:
 - SMALL KIT USAGE GUIDELINES**
 1-3 PASSENGERS
 - MEDIUM KIT USAGE GUIDELINES**
 1-8 PASSENGERS
 - LARGE KIT USAGE GUIDELINES**
 1-16 PASSENGERS
 - 17+ PASSENGERS**
 Will require 2 large kits. However multi-level vehicles might require more than two kits.

RELEQUIP™

Surgery and Ambulance Equipment

First Aid Rooms feature in new HSE Case Study document.

Accompanying the new HSE Health and Safety (First Aid) Regulations and Guidance document (L74 revised), is a new collection of case studies, designed to add context to the guidelines. Eleven different scenarios include:

- Convenience Store • Supermarket • Nursing Home
- Office • Secondary School • Primary School
- Café • Construction Company
- Chemical Processing Plant • Remote Locations
- Trainside Railway Maintenance Co.

Each case study creates a detailed scenario including the layout of the site, the number of employees, and the accident history.

In seven out of the eleven case studies, the conclusions point to a clear need for a first aid room in the workplace. In the office scenario with eighty employees working on two levels, and a history consistent with most office environments, a first aid room is prescribed.
